INTUITIV-E

The Intuitiv-E remote control handset is the result of years of research into **ergonomics** in driving situations with clients and professionals. The handset is very interesting to hold, as the driver spontaneously finds **the right ergonomics**. Intuitive thanks to its lever control (joystick), the thumb is naturally placed over it, allowing an **easy memorization** of the functions and to **stay focused** on the road. The Intuitiv-E operate until **12 functions** : indicators, horn, front wipers (intermittent low and high speed), rear wiper, front and rear washers, low beam, high beam, flash headlights.
